

Hello!

Things I like: running

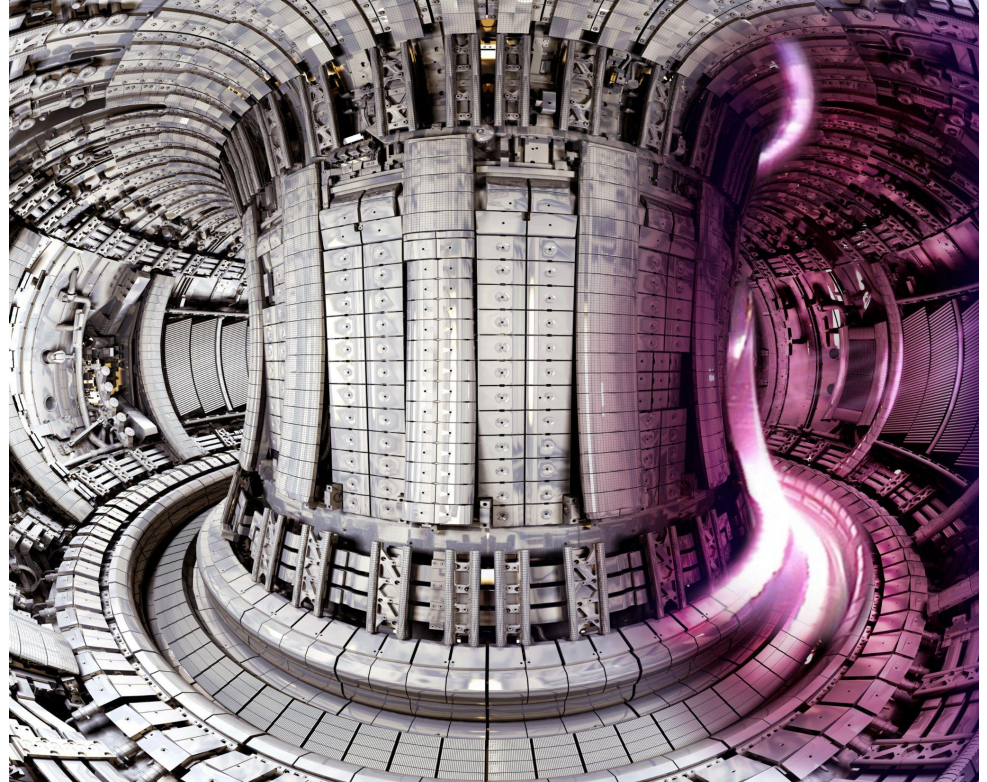

Things I like: photography

Work that I'm proud of: CCFE

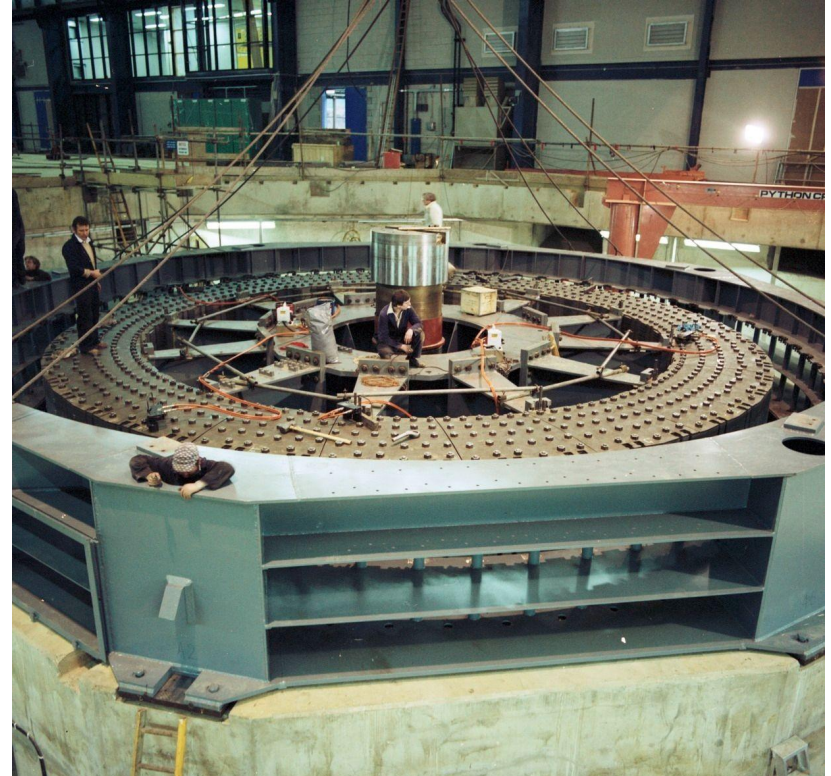

I spent a year working at the *Culham Centre for Fusion Energy*, Europe's nuclear fusion research facility.

CCFE houses the Joint European Torus (JET), which held the record for greatest fusion power produced until 2021.

Work that I'm proud of: CCFE

JET requires more energy than the grid can provide, so it uses two 800 tonne flywheels.

Work that I'm proud of: CCFE
